

Technical Rider INTERR_OPTIONS

INTERR_OPTIONS is solo performance by Eva Krause, produced by Moving Rhythms Production.

This technical rider provides an overview of the requirements of this production. But the setup is also adaptable to different environments. Please consult with the show technician at least two weeks prior if any requirements can't be met.

Technician

Vincent Gisi
Unterer Heuberg 21
CH-4051 Basel
Tel: 0041 79 585 54 26
Mail: vgisi@gmx.ch

WE BRING:

Stage props

a pair of shoes, a shirt, a Cajón, a glas of water.

WE REQUIRE:

Stage

Minimum stage area	6m x 4m
Ideal stage area	9m x 6m

The floor - preferably wooden - is part of the percussive landscape that will be created. It is necessary either to have an empty space that resonates beneath the floor. Or a stand in the size of the stage has to be built on top of the floor, maximum height 20cm.

The stage area should be fully covered with black dance floor and taped with black PVC tape.

Please lay the floor before the company arrives.

Audience space

A hall with not more than 200 seats with the audience on upwards stands.

The audience shouldn't sit below the level of the stage.

Sound

All sounds are created live, there is no need for an PA.

Unless the stage and the audience space is rather big, then an amplification is needed with a microphone setup underneath the stage.

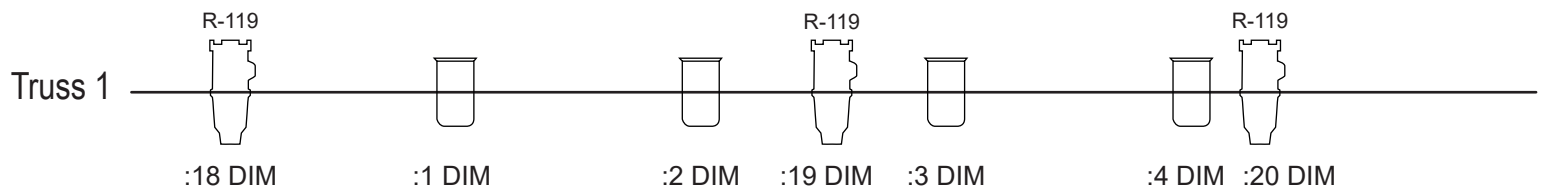

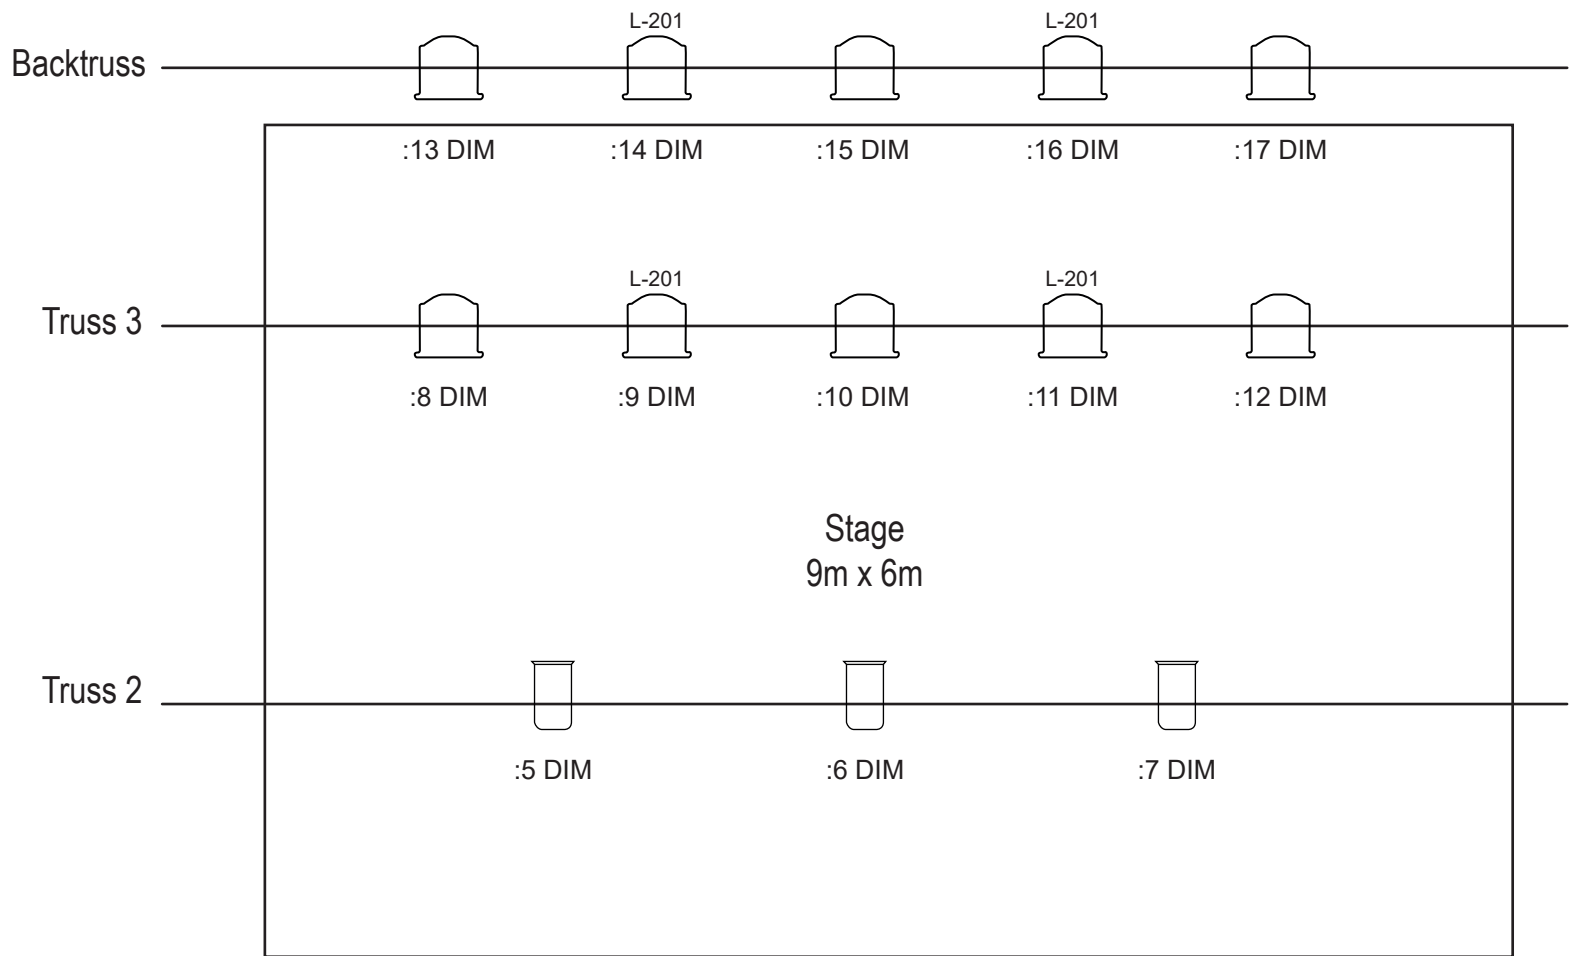

Light

Dimmers: at least 15 channels, 2kW each.

Light console with memories and submasters.

If possible, we ask the venue to pre-rig before our arrival.

Amount	Device	Usage	Position	Supplier
2x	1kW Fresnel or PC spots with L201 Filter	Backlight 2	Backtruss	Organisers
3x	1kW Fresnel or PC spots	Backlight 3	Backtruss	Organisers
2x	1kW Fresnel or PC spots with L201 Filter	Backlight 1	Truss 3	Organisers
